

One Day Workshop on Flexible Electronics Technology (WFET-2019)

25th March, 2019

CSIR-Central Electronics Engineering Research Institute,
Pilani-333 031, Rajasthan, India

Flexible electronics is fast emerging technology after revolutionary microelectronics and MEMS. IOT enabled entities are subject to realisation of flexible electronics for smart living in smart society belonging to smart cities. India needs to take a lead and contribute significantly in this changing technology platform. A debate is therefore required to chalk out R&D strategy for this highly interdisciplinary area of next generation technologies. The workshop is aimed to share views of active researchers with a current status.
